UCI Wireless Access Registration -- Register your iPad (iPhone) or any computer devices for UCIMC and campus wireless access. The instruction below can also be used for other mobile device:

1. Go to the OIT UCInet Mobile Access page
   (http://www.nacs.uci.edu/ucinet/mobile/)
2. Click on the link, "Register your computer or mobile device"
3. Click on Find Your MAC (Media Access Control) address
   (http://www.nacs.uci.edu/ucinet/mobile/find_mac.html#iphone)
4. Click on the iPhone tab (iPad has the same setting)
5. Follow the iPhone instruction for your iPad and write down the number where it said Wi-Fi Address
6. After you have written down the Wi-Fi Address, go back to the "UCInet Mobile Access Registration" page and select "Register Your MAC Address"
   (http://www.nacs.uci.edu/ucinet/mobile/registration.html).
7. The above step will take you to the UCInetID login page. Enter your UCInetID and password to proceed.
8. Click the MAC Address button; this will take you to the "UCInet Mobile Access Registration" page
   ▪ Enter the Wi-Fi Address you wrote down in the MAC address box
   ▪ Leave the IP Address blank
   ▪ Enter the word, “My iPad” in the Comments field. This helps to distinguish the mobile device you register in case you have more than one device, e.g., Smartphone, laptop, etc.
   ▪ Click the Submit button to proceed and you are done registering the iPad.
   ▪ If you have additional mobile devices (e.g., smartphone, laptop, etc.), repeat the above steps.
   ▪ Click the logout button to leave the registration page.

If you have multiple mobile devices, you will want to register them all. The registration will provide you with wireless and non-restricted access to all the UCI Libraries resources while you're on campus or at UCIMC including building 200 and the City Tower.

In order to access the UCI Libraries restricted online resources from home or elsewhere with your Apple iPhone/iPod/iPad Touch, you will need to download the VPN for your mobile device. Below is the instruction:

1. Go to "Getting Started with Virtual Private Network (VPN)
   http://oit.uci.edu/security/vpn/
2. Move the page down until you find, "3. iPhone/iPod/iPad Touch VPN".
3. Click the link, "iPhone Configuration Wizard " to install the VPN on your mobile device.
