1. Locations of Nursing Resources
   a. Print textbooks, reference works, etc. - Call number WY …
      i. Grunigen Medical Library (GML) (UCI Medical Center)
      ii. UCI Science Library (Irvine Campus) - 6th floor Bar (A few reference works located in the 2nd floor Reference Collection)
   b. Print journals - Call number W1 …
      i. Grunigen Medical Library (UCIMC) - Shelved by full title
      ii. UCI Science Library (Irvine Campus) - 4th & 5th floor Drum (Some current unbound issues in the 2nd floor Current Periodicals shelved by title)
   c. Online Resources - Journals, eBooks, and others
      i. Grunigen Medical Library Website - https://grunigen.lib.uci.edu
      ii. Library Search – http://lib.uci.edu/search
      iii. Nursing Subject Guide - https://guides.lib.uci.edu/nursing

2. Finding Books, Journals, Articles, and more …
   a. Library Search allows you to search for print and e-books, journal articles, digital collections, and more, all in one place. With Library Search you can find, explore, cite, save, and share a broad variety of UCI library resources.
   b. CINAHL Plus with Full Text

   CINAHL Plus with Full Text (http://uclibs.org/PID/105806) focuses on nursing and allied health and contains the full text of articles for more than 770 journals. The UC-eLinks option adds to this number by providing access to the full text for thousands of additional titles. In the event that the full text of an article is not available via either option, or available in print in the UCI Libraries, you may submit an interlibrary loan request directly via the UC-eLinks menu.

      i. Example -- nosocomial infections prevention ~258 results
      ii. Full-text available in CINAHL – “Prevention of Nosocomial infection in NICU”
      iii. Full-text available via UC-eLinks - "Modified gloves: A chance for the prevention of nosocomial infections."
      iv. Full-text not available online via UC-eLinks – “Nursing care to patients with invasive mechanical ventilation by tracheotomy - Strategy for the prevention of nosocomial infection."

         * First, click on the UC-eLinks icon, and “Check UCI Library Search.” If not available, then, use the option for “Request It - Request this from the library” in the UC-eLinks menu to submit an interlibrary loan request.
Nursing Resources at the UCI Libraries
Guide for the Nurse Residency Program – Fall 2018

Full text in CINAHL

Full text available via the UC-eLinks

Full text may not be available for this item. Use the UC-eLinks to check the Library catalog or submit an interlibrary loan request.

UC-eLinks

Title: Nursing care to patients with invasive mechanical ventilation by tracheostomy - Strategy for the prevention of nosocomial infection.
Source: Nursing [0857-6196] Pereira, Sonia yr 2011 vol 23 iss:273 pg:2 - 7

This item may not be available online. Check for a copy, or Request it from another library.

Try this option first

1. Check UCI Library Search
2. Check the UC Libraries Catalog: Melvyl

If UCI doesn’t own, then select this option to submit an interlibrary loan request. It’s free (in most cases) for all students, staff, and faculty.
c. PubMed

**Be sure to always access PubMed from the UCI website.** Even though PubMed is a freely accessible online resource (supported by your taxes!), in order to have access to full text via the UC-eLinks, you MUST access PubMed@UCI through a UCI Library webpage, such as the Grunigen Medical Library (https://grunigen.lib.uci.edu/). Accessing PubMed through Google or another source may not allow access to the UC-eLinks.

i. **Example -- nosocomial infections prevention** ~37495 results

ii. **There is no full-text in PubMed.** You must always link out to the full articles, when available, using one of the options below:

   - **UC-eLinks icon [UC-eLinks]** (only visible in the ABSTRACT display format)
     
     *This is the option most likely to lead to the UCI Libraries’ subscription for full-text journals.*

   - **PubMed Central icon [PMC Full text]**
     
     *This option leads to a full-text archive of biomedical and life sciences journal literature*
at the U.S. National Library of Medicine. Some journals may have an embargo period ranging from 6 months to 2 years, and not all articles are available from every journal.

- **A publisher icon**
  This may lead to a paywall, and not to the UCI Libraries subscription. Still worth trying if no other option works.

3. **Other Core Online Resources** - [https://grunigen.lib.uci.edu/core-resources](https://grunigen.lib.uci.edu/core-resources)
   a. **Stat!Ref Nursing** (mobile app available) - Online textbooks, Calculation tools, Medical Dictionary, AnatomyTV, etc. Over 40 full text titles
   b. **ClinicalKey for Nursing** – An online resource for nurses offering authoritative information to help provide better patient care. Includes nursing and midwifery evidence-based information resources including key journals and textbooks, as well as evidence-based nursing monographs, drug information, dosage calculators, lab test values, practice guidelines, multimedia, and core measures with nursing recommendations. This is a companion to the **Mosby Clinical Skills** resource available on the HS Intranet.
c. **Nursing Education in Video** - An online collection of videos created specifically for the education and training of nurses, nursing assistants, and other healthcare workers.

d. **AccessMedicine** (mobile optimized) – Includes the full-text of over 80 major medical texts such as Harrison's Principles of Internal Medicine, William’s Obstetrics, the Current Diagnosis & Treatment series, and Lange's Basic Sciences and Clinical Sciences Series. Also contains an extensive drug reference, Quick Medical Diagnosis & Treatment, multimedia, and an extensive “Case Files Collection” ([http://casefiles.mhmedical.com/Index.aspx](http://casefiles.mhmedical.com/Index.aspx)) in the basic sciences and clinical medicine.

e. **DynaMed Plus** (mobile app available) - A clinical reference tool that helps to answer clinical questions at point-of-care. Contents provided by experts in each field, synthesizing the evidence and providing an objective analysis. Includes patient education materials.

f. **UpToDate** (mobile app available) – Filtered, synopsized, and evidence-based information. Specific practical recommendations for diagnosis and treatment are provided. Includes patient education materials.

g. **Cochrane Library** -- A collection of evidence-based databases including the Cochrane Database of Systematic Reviews, the Cochrane Controlled Clinical Trials Register, the Cochrane Review Methodology Database, and more.

h. **Micromedex** (mobile app available) – A collection of databases that provides comprehensive drug, acute care, and toxicology information. Included are sections on Drug Interactions, IV Compatibility, Drug IDs, Drug Comparisons, Tox & Drug Product Lookup, Calculators, and CareNotes®.

i. **Clinical Pharmacology** - A comprehensive drug reference tool that supports healthcare professionals when in need of medication decisions by providing current, accurate and clinically relevant drug information.

j. **Natural Medicines** -- Provides evidence-based information about complementary and alternative therapies. Natural Standard is an international research collaboration that aggregates and synthesizes data on complementary and alternative therapies. Therapies covered are researched and categorized based on the quality of available evidence.

k. **Red Book Online** -- includes the most reliable and clinically relevant content on more than 200 childhood infectious diseases and is the quickest and easiest way to keep pace with all the latest developments and clinical guidelines at the point of care.

l. **VisualDx** (mobile app available) – A diagnostic clinical decision support system designed to enhance diagnostic accuracy, aid therapeutic decisions, and improve patient safety. Quickly search by diagnosis, build a patient-specific differential, or review travel or medication-related events at the point of care.

m. **Trip Pro** – A clinical search engine designed to allow users to find and use high-quality research evidence to support their practice and care. Includes primary and secondary research information including evidence-based synopses, clinical questions, systematic reviews, international practice guidelines, electronic textbooks, clinical calculators, medical images, patient information leaflets, and more.
n. **NEJM Journal Watch** -- Used by healthcare professionals to stay informed and current in their fields. The most important research, medical news, drug information, public health alerts, and guidelines across 13 specialties are summarized and put into perspective for you by our team of physician editors.

o. **Mobile Resources** – Many of the eResources subscribed to by UCI have a mobile-optimized and/or a mobile app available. Some require that you register from a UCI Network address. Please see [https://guides.lib.uci.edu/mobilemedicine/home](https://guides.lib.uci.edu/mobilemedicine/home) for more information.

4. **Remote and Wi-Fi Access**

   The UCI Libraries provide access to thousands of online resources including eBooks, full-text journals, article databases, point-of-care reference tools, and much, much more.

   These resources may be accessed directly from any of the UCI computer networks, and remotely via simple authentication using your UCINetID.

   a. **The VPN (Virtual Private Network)** - [https://www.lib.uci.edu/connect](https://www.lib.uci.edu/connect)

      949-824-2222 (Helpline), [oit@uci.edu](mailto:oit@uci.edu)

      i. You may connect to these online resources from off-campus using the VPN. **We strongly suggest using the software option (Cisco AnyConnect VPN Client)** which is available for current Windows, macOS, and Linux operating systems.

         For more information on obtaining and installing the VPN software go to [https://www.oit.uci.edu/help/vpn/](https://www.oit.uci.edu/help/vpn/). Follow the installation instructions closely. Be sure to select **UCIFULL** (Route all traffic through the UCI VPN) from the **Group** drop-down menu the first time that you open the VPN software after installation.

      ii. A second option is the WebVPN. Go to the webpage at [https://vpn.nacs.uci.edu](https://vpn.nacs.uci.edu) and login with your UCINetID. You will then be taken to a second webpage with links back to the UCI Libraries. We do not encourage this option as there are some resources that may not work well with the WebVPN. However, this may be the only method to use if you are not able to install the VPN software on the device you are using such as a computer at a public library, hospital computer lab, etc.

      iii. Go to [https://www.oit.uci.edu/help/ucinetid/](https://www.oit.uci.edu/help/ucinetid/) for more information on the UCINetID.

b. **Wireless Access**

   i. Wi-Fi access at the UCI Medical Center is provided by the UC Irvine Health Information Services. For more information please go to [http://it.health.uci.edu/Network/](http://it.health.uci.edu/Network/).

   ii. UCI offers mobile Internet access via Wi-Fi across many locations on the Irvine campus. UCInet Mobile Access provides UCI affiliates and visitors a fast and convenient way to connect to the web with mobile computers and devices. Go to [https://www.oit.uci.edu/mobile/](https://www.oit.uci.edu/mobile/) for more information.

   c. Other Research Guides - https://guides.lib.uci.edu/

6. Grunigen Medical Library Services
   a. Obtain a library card or barcode for your badge at the front desk. It only takes 2 minutes!
   b. The general book collection circulates for 90 days for staff and faculty.
   c. BOUND journals circulate for 7 days for staff and faculty.
   d. Reserve items (e.g., Neonatal Resuscitation textbook, ACLS Manual, BLS for Healthcare Providers, Pediatric Advanced Life Support) can be checked out for 1 week, no renewals. First come, first served - they cannot be held for later pick-up.
   e. Laptops, USB chargers and cables – 1 week. No Renewals.
      i. Get a print/copy card at the card dispenser by the front desk
      ii. B&W -12¢ ; Color - 25¢ ; Photocopying - 8¢
   g. Charging Station for phones and mobile devices
   h. Open & restricted workstations & scanners available.
      i. You MUST display your badge while in the computer lab area.
      ii. Access QUEST using CITRIX – infocard at the ITC Desk
   i. Reserve the classroom, conference room or study room
      https://grunigen.lib.uci.edu/reserve-room
